Who can use this training?

Thousands of people have learned and continue to use this technology and the teaching of Patterns for Renewing Your Mind.

In addition to seminars for the general public, much time is spent in the teaching of Patterns for Renewing Your Mind with professional therapists, counselors, social workers, teachers, managers, medical doctors, psychiatrists, psychologists and religious leaders around the world. Thousands of health professionals use these powerful techniques with their clients as well as in their personal life.

The foundation for this training is the book The User's Manual for the Brain: The Complete Manual for Neuro-Linguistic Programming Practitioner Certification, written primarily by one of your trainers, Bob Bodenhamer. Bob developed the materials contained in this book and hence this training through teaching the model for ten years in the Adult Education Department at Gaston College, in Dallas, NC.

I (BB) am so indebted to Gaston College for allowing me to teach in their institute for those years. Michael Hall, Ph.D. assisted in writing this book. The book has now sold over 9,000 copies. It is and has been used as a text book in colleges and universities. One of our trainers, retired Navy Chaplain, Stan McCreary, Ph.D., used the book in a course he taught on General Psychology at a Christian College. Indeed, the book has proven to be foundational for many people entering the model.

Our promissory contract to you:

This training has a two pronged approach:

- First and foremost is the teaching of you as an individual to better master your on mind-set, states of mind-body and hence behavior.

- Second, as a result of your learning how to master your mind-body states, your professional life will be greatly enhanced as you can much more efficiently teach your clients how to "run their own brain" rather than the letting of events of the past and the present in addition to the perceived future run their lives.

You have entrusted your time, effort and money for this training. We take seriously our commitment to you. We offer to you our commitment in teaching you the how of these two goals so that the model becomes a part of your personal and professional life.

What you will learn:

- A cutting edge model of "**HOW**" your mind works

- Tools and strategies that show you "**HOW**" to use this model to effectively change your thoughts and emotions and bring them into harmony with God's will.

- Tools and strategies that show you "**HOW**" to effectively apply this model with others and help them to renew their minds.

WHY YOU SHOULD TAKE THIS TRAINING

"**Patterns for Renewing Your Mind**" is an innovative approach to understanding and directing human experience, communication, and behavior. The sciences that created this model are the leading-edge technologies for accelerated human change.

We finally understand the relationship between mind, body, emotions, and actions. And, by understanding "how" they interact as a systemic whole, we now know how to so order our thinking as to obtain the outcome we desire for ourselves and for our client.

This model enables you to change your life by controlling *how* you process your thoughts and emotions. And by learning *how* to do this for yourself, you are enabled to teach your clients *how* to attain the same mind-sets.

These technologies must be "experienced" in order to understand. And that is the purpose of the last 3 full days of the training. During this time, we will all assemble for 3 intensive days of practicing the techniques making sure all understand the processes well enough to not only run them on themselves but teach others how to do the same.

CONTINUING EDUCATION UNITS:
Patterns for Renewing Your Mind, Inc. as a part of The Institute of Neuro-Semantics® is approved by The National Board For Certified Counselors to offer continuing education activity for National Certified Counselors. We adhere to NBCC continuing education guidelines.

Certification and Core Competencies

Certification will be based on completion of 49 hours of course work which includes attendance to the 14 weekly online sessions and the 3-Day onsite session, completion of assignments and demonstrated proficiency in the following Core Competencies:

- Establish and maintain rapport in order to pace, match and mirror the client's verbal and non-verbal signals.
- Pacing and Leading – Understanding the importance of staying with your client (pacing) and knowing 'when' and 'how' to lead them closer and closer to their outcome for the therapy.
- Understanding how to lead yourself and your client in the establishing of outcomes that are both "attainable" and "right" for each of you.
- Identify how the mind-body system creates states of mind.
- Process information and communicate in ways that help you connect with all people...
- Demonstrate how to both access and elicit the mind-body states of your client and how to lead the client in changing the un-useful states of mind-body in to one's that are useful.
- Identify the importance of *association* (inside a state) and *dissociation* (outside a state) in state management and demonstrate knowledge as to the "how" of leading the client to switch back and forth between the two.
- Utilize the structure of language to create positive thought patterns in yourself and others.
- Utilize the structure of language in *directionalizing* your client's perception towards and eventually to accept ownership of your mutually agreed on goal for the therapy.
- Setting of state-triggers (Anchoring) that allow the client the ability to not only access the specific state but to be at choice as to trigger the state when needed.
- The learning of patterns (20 total patterns) to overcome procrastination, depression, phobias, fears, anxiety and other "negative" states.
- Disconnect from the power of past negative experiences that block you from achieving your goals...
- Accelerate your personal and professional growth and success.
- Identify un-useful mental frames and leading the client in developing more useful reframes by both suggesting different contexts and/or meanings of the client's un-useful mental frames of mind
